BILDAD SIMIYU WANJALA

EMAIL: bildadsimiyu6@gmail.com

GITHUB: https://github.com/rawbil

LINKEDIN: https://www.linkedin.com/in/bildad-simiyu-324431299/

Skills

Programming Languages: JavaScript, Typescript, Python, GO, Dart, PHP, SQL

Frameworks & Libraries: NextJs, Node.js, Express.js, Nest.js, FastAPI, LARAVEL, PRISMA ORM, Clerk

Databases: MYSQL, PostgreSQL, MONGODB

Tools: Docker, Git, REST APIs, WebSockets, Tanstack Query

Experience

AAA Platforms Limited/ INTERN
May 2025- July 2025, MOMBASA

- Developed backend applications using Laravel and MySQL.
- Designed and implemented database structures, queries, and API endpoints.
- Collaborated with developers and designers to deliver software solutions from conception to deployment.
- Participated in testing, debugging, and maintenance of web applications.
- Deployed and maintained full-stack applications on Render and Vercel.
- Assisted in troubleshooting production and deployment issues in cloud environments.

Jeymex Tech/ INTERN
JANUARY 2025 - FEBRUARY 2026, REMOTE

- Gained hands-on experience with the NestJS framework, websockets, PostgreSQL database and Clerk for authentication, contributing to backend

development and API implementation.
- Collaborated with software developers in an agile environment to design, develop, test, and maintain web applications.
- Contributed to the maintenance and enhancement of **Elimu Bora**, an AI-powered educational platform that delivers personalized learning, revision tools, AI tutoring, and performance analytics for primary and junior secondary students across Africa.
- Contributed to the maintenance and improvement of **Okolea360**, a community-driven peer-to-peer micro-lending platform that enables trusted-network borrowing, lending, and reputation-based financial interactions.

WorldQuant Brain/ Quantitative Research Contributor
PRESENT

- Conducting research on financial markets and building financial models that seek to predict the future price movements of various financial instruments.

Education

TECHNICAL UNIVERSITY OF MOMBASA

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Expected Graduation: 2026

Specialization: Fullstack Web Development, Mobile Development, Data Science and Machine Learning

Clubs: GDG on Campus(Google Developer Students Club)

Projects

HeyBuddy101 – Service Marketplace Platform

https://heybuddy101.com

- Designed, developed, and deployed a full-stack service platform connecting users with service providers (“buddies”) for services such as travel, tutoring, and adventure experiences
- Implemented real-time chat functionality to enable seamless communication between users and service

providers
- Integrated **M-Pesa Daraja API** to support secure mobile payments and transactions

SMART INVENTORY MANAGEMENT SYSTEM

https://github.com/rawbil/SIMS

- Designed and developed an inventory management system for SMEs that leverages Machine learning to track daily inventory activity, forecast demand and identify stockouts.
- Implemented time-series forecasting using Facebook Prophet model.

Additional Projects

- More projects are available on my github: https://github.com/rawbil
